Principal (DAV)

D A V Public School

Neeljay (WCL)

The school building is constructed with RCC pillars with slab and the structure of the building is designed in such manner that the each and every corner of the school is easily accessible to the students, staff & parents including person with disability. In case of any kind of emergency the building is provided with three separate exits in different directions of the building with Security Guards. The building provided with lighting conductor for safety from lightning.

It is noteworthy to mention that, as the minning site of the Western coal fields Ltd is nearing the school land after a period of 26 years DAV Public School, Neeljay Wani Area has undergone Building stability Audit by the Committee of Deptt. of Civil Engineering Vishveshwaraya National Institute of Technology Nagpur. As per this stability report, the building structure is sound and safe. Furthermore, the proposal for shifting of DAV School has been tendered and is under scrutiny, the constructin work shall be started soon after the award of work.
